

COMPANY PROFILE

FGS Denimwear Limited

(Kathgora, Zirabo, Ashulia, Dhaka)

The Profile

FGS Group instigated its journey in 14 July, 2007 with a vision of becoming one of the most recognized leading manufacturer and exporter of readymade garments in Bangladesh managed by a team of professionals engaged in the business for more than a decade have gained immense reputation at home and abroad. FGS Denim Wear a sister concern of FGS Group established on 7th April, 2012 with work force over 1000 and advanced mechanized production facilities. The group is continuously performing at the level required to satisfy the demand of the buyer spread over Europe and USA. Innovative business approach, dynamic vision, foresight, sustainability, mobilization, advance mechanized production facilities, quality assurance and superior services are the keys for our success and we are determine to continue with the same in the future. We accomplish the Compliance requirements of our buyers to the best of their satisfaction .During these years in Bangladesh particular and the world in general has undergone political, social and economical changes which transformed the business scenario too much aggressive, competitive, and professionally competent which the group has achieved successfully to survive and succeed in the industry.

Design & Development

FGS Group launched its product design & development division at the beginning of its establishment by remodeling its sampling division. This full-fledged section is delivering exactly the right samples as per client's requirement. Working with the clients closely, from an initial sketch or original sample to the development of a range of counter samples, it ensures value for clients.

Its designers, all are trained in reputed institutions; blend their skills with inputs of ever-changing global fashion trend. And as a team, they develop its own collection of knitwear apparels, along with, turn over the client's sampling request.

Vision

To become a world class integrated readymade garments manufacturer.

Mission

Company will reach its vision expanding the customer line providing the best service to the customers, retaining the existing skilled employees and recruiting new potential employees providing cutting edge training and adopting the latest technologies in factory.

Work Methodology

We are very organized and systematic in terms of planning and execution. We are equipped with latest cutting edge information technology which helps us to make a very good planning, scheduling, controlling and execution. When we receive a development, first, assess the risks of the product and according to that we take necessary action. In the production stage, once we receive the order confirmation then we make a plan and the respective authority follow up each and everyday the work progress.

The End
